# AI Server

A Game Changer In AI Server Application

The rise of AI and machine learning is creating substantial demands for data storage. Transcend's cutting-edge storage solutions, BiCS5 SSDs and DDR5 DRAM modules, offer reduced latency, high-speed transfer rates, and ample storage capacity (up to 8TB), helping AI servers handle expansive data sets.

Rapid Data Retrieval

Fast data access improves system responsiveness, enhancing AI algorithm efficiency.

Utmost Reliability For 24/7 Operation

100% in-house tested and branded chips used for high storage resiliency.

Valued-Added Technologies

SLC Mode, PLP, and TCG Opal 2.0 compliance ensure SSDs' durability, security, and reliability in critical conditions.

Featured Products

PCIe Gen 4x4 U.2	PCIe Gen 4x4 M.2 2280	PCIe Gen 4x4 M.2 2280	PCIe Gen 4x4 M.2 2280	DDR5 DRAM Modules
UTE210T	MTE712A	MTE712P	MTE560I
